Continuation of 3. NOTE: The proposed change of the word "encapsulating" to "surrounding" raises new issues, since the word encapsulate (see http://www.onelook.com/?w=encapsulate&ls=a) means to enclose as in a capsule. Salerno et al shows in figure 25E a color filter layer (1034) being encapsulated by a a capsule-like configuration of the thin layer 1030 topped or closed with the planarization layer 1038. The planarization layer, together with the thin layer, forms a capsule in which the color filter layer is located. Hence, the color filter layer is encapsulated by placing the planarization layer on top (one can also encapsulated top and bottom, as well as side to side, see above). To change the word "encapsulate" to "surround" would change how the planarization layer and the color filter layer are configured. Also, the planarization layer 1038 encapsulate the black matrix 1036, as shown in figure 25E The bottom part of the "capsule" would be substrate 1020 (see figure 25B) and the top would be the planarization layer 1038.

Conunuation of 11. does NOT place the application in condition for allowance because: the proposed amendment raises new issues that would require a further search..
